

Crystal Power Plus

Extreme increase in output and saving for 100'000 km!

Non-toxic special wax coating of engine and transmission.

«The specialists are surprised while the laymen's rest astonished»
this slogan hits the essence of our new product „Crystal Power Plus“.

Your advantages:

- Up to 40% reduction of motor oil & full consumption, noise, wear, environmental impact and others
- Old vehicles normally experience an unbelievable „re-birth “
- Ordinary car engines reach multiple km achievements and this repair-free!
- Increase of performance up to 30% and increase of revolutions up to 20% possible!
- The fuel and oil consumption decreases rapidly, up to 30%
- Driving a car becomes an unknown pleasure!
- The metal abrasion and wear are reduced up to 60%
- Cost-use relationship is about 1:50, hardly a money brings more net profit!
- Performance increase is free of charge!
- Crystal power plus rank's on top of environmental exculpatory products!

Application:

Engines to be treated with **Crystal power plus** must be well run-in. That means: Petrol engines 10,000 km, diesel engines 10,000 - 30,000 km.

After oil-change (warm engine) and oil filter change, fill-up 20 - 25% of total motor sump capacity with **Crystal power plus** (shake before use about 30 times!) and top-up the remaining volume with ordinary motor oil.

For transmissions (**hand switched only !!!**) exchange about 25% of the transmission oil with **Crystal power plus**.

Crystal power plus shall **not to be used** under any circumstances in **automatic transmissions - slipping through danger!**

Optimal coating of the engine after 6'000 to 7'000 km, optimal fuel savings after 10'000 km drive.

Packing: Crystal power plus is available in 1 l and 5 l bottles.

Crystal Power Clean

Engine/motor cleaner **Crystal power clean** should be added (2.5 dl) to the old oil before oil change. To be used for engines/motors with more than 100.000 km performance. (old sediments would neutralize the **Crystal power plus** particles and avoid their efficiency)

Cleaning of the engine is recommended every 150'000 km

Crystal power Clean is available in 0.5 l bottles.

Please ask for the brochure of our fuel-optimizer **Crystal Top-Fit!**

We wish you a good trip!
